

## Description

|                    |                                                                                                                                                                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Material</b>    | Artistic canvas made of polyester-cotton, natural colour and matt primer                                                                                                                                                                                               |
| <b>Coating</b>     | Universal primer, white and matt                                                                                                                                                                                                                                       |
| <b>Properties</b>  | <p>Fine grain</p> <p>Universal primer suitable for acrylic, oil and gouache paint</p> <p>Due to its structure and flexible primer it can be nailed into the frame without cracking the edges</p> <p>Linen-coloured back</p> <p>Five primers applied on the surface</p> |
| <b>Application</b> | Fine Arts                                                                                                                                                                                                                                                              |
| <b>Durability</b>  | for long term use                                                                                                                                                                                                                                                      |
| <b>Paints</b>      | Suitable for oil, acrylic and gouache paints                                                                                                                                                                                                                           |

## Laminating

To protect the work of art from environmental aggression, we recommend varnishing the surface. For this purpose we recommend using a fine art varnish, which is suitable for this application.

## Technical Data

|                    |                                                |
|--------------------|------------------------------------------------|
| <b>Material</b>    | Polyester/Cotton                               |
| <b>Confection</b>  | Flat                                           |
| <b>Density</b>     | 44                                             |
| <b>Thickness</b>   | 240 µm                                         |
| <b>Weight</b>      | 280 g/m <sup>2</sup>                           |
| <b>Dimensions</b>  | 2100 mm                                        |
| <b>Roll length</b> | 10 m (any other size is manufactured to order) |

## Storage

We recommend keeping the art canvas in an environment with a relative humidity of 35 to 65% and a room temperature of 10 to 30°C.

## Note

Due to the natural components of thread the final appearance of the canvas may vary slightly. The reverse side of the canvas may have some slight variations in tonality.
